

High Cholesterol

Research Study

Do You Have High Cholesterol?

APPROVED: **Jan 20, 2017**
COPERNICUS GROUP IRB

You may be eligible for a clinical research study being conducted to test the safety and effectiveness of an investigational medication that may help to lower cholesterol levels in people who are at high risk for cardiovascular disease who have high cholesterol that is not well-controlled with current medications.

To qualify you must:

- be at least 18 years of age,
- have high cholesterol,
- have HeFH (heterozygous familial hypercholesterolemia) and/or atherosclerotic cardiovascular disease,
- are taking cholesterol medication, including statin medications, to prevent cardiovascular events at the highest dose you are able to tolerate,
- meet additional study criteria.

Qualified participants will receive all study medication and study-related care from a dedicated team of medical staff at no cost.

Health insurance is not required to participate.
